THEME OF THE SEMINAR

THEME: ACTIONS@75

After Independence, India formed its own Constitution and government to run the country peacefully and to move towards steady growth. Education was a vital contributor to the growth of the country and hence, it has always been a primary focus for the Union and state governments since the beginning of the post-independence era in India. Maintaining an appropriate standard of education for the continuous growth of an individual and the country was a big challenge. To attain steady growth in education, the government set up a planning commission in 1950, to prepare a blueprint for the development of education in India. Various plans were drawn after that, the main goals of these plans were –

1. To achieve universal elementary education.
2. To eradicate illiteracy.
3. To establish vocational and skill training programs.

The education policies of India saw various reforms in the post-independence era based on the need of the hour; to mention the changingscenario of education policies in India post independence,

1. National Policy of Education – 1968
2. National Policy of Education—1986
3. NPE 1986: Modifications
4. New Education Policy 2020: Emergence

This National Education Policy envisions an education system rooted in Indian ethos that contributes directly to transforming India, that is Bharat, sustainably into an equitable and vibrant knowledge society, by providing high-quality education to all, and thereby making India a global knowledge superpower. The Policy envisages that the curriculum and pedagogy of our institutions must develop among the students a deep sense of respect towards the Fundamental Duties and Constitutional values, bonding with one's country, and a conscious awareness of one's roles and responsibilities in a changing world. The vision of the Policy is to instill among the learners a deep-rooted pride in being Indian, not only in thought, but also in spirit, intellect, and deeds, as well as to develop knowledge, skills, values, and dispositions that support responsible commitment to human rights, sustainable development and living, and global well-being, thereby reflecting a truly global citizen.

The success of this new education policy will depend on how it is implemented. This seminar is focused to provide depth knowledge on the various important highlights of National Education Policy. India is the country with the youngest population and India's future will depend on providing high-quality educational opportunities to these youth.
